MORI no KAISHO / Daiwa House Group MIRAI KACHI KYOSO Center "Kotokurie"

Tetsuo Kobori Architects, Daiwa House Industry Co., Ltd., and Fujita Corporation

• Selected in Architectural Design

We aimed to create a place of open exchange and co-creation for 49,000 employees with this project, implemented at the request of Daiwa House Group, which engages in the provision of construction and real estate services. We started by thinking about the significance of a place for people gather in…

Sustainable coexistence of architecture and design at the Hard Rock Hotel Budapest

S39 Hybrid Design

• Selected in Architectural Design

The metal crown atop the Hard Rock Hotel Budapest gave the classicist building a unique appearance. The perforation design on its facade not only offers a scenic view from the hotel rooms but also ensures privacy. Initially seen as waste, the capsule-shaped molds cut out of the metal sheets during…

113 w136 St - A Prototype for Modular Affordable Housing on Small NYC Lots

Soluri Architecture

• Selected in Architectural Design

This prototype shows how small urban infill sites can help solve New York City's housing crisis by using design-based solutions to add-value, reduce cost and make

Raicam Driveline Factory

Rocco Valentini Architecture s.r.l.

• Selected in Architectural Design

The goal of the project for the new Raicam Driveline factory in Mondovì was to create a comfortable, non-alienating environment for the factory's workers and employees. To achieve this goal, a green space was introduced inside the work spaces, with translucent roofing and a careful study of the use …

Seaport Circle

Arrowstreet Inc

• Selected in Architectural Design

Seaport Circle is a new type of project-a hybrid building/landscape that fosters opportunities for social impact, enriches the environment, and creates economic opportunities for all. The development strives for equity beyond the architecture. The mission of creating an equitable project informed …

TIMELESS

APOLLO Architects & Associates Co., Ltd.

• Selected in Architectural Design

This house in a quiet residential neighborhood of central Tokyo was built for a couple who had long lived on the property but wanted to rebuild as they entered a new phase of life after their three children left home. The simple exterior design comprised of two massive volumes piled on top of each o…
