I Accept

architectural language, is detached from the nineteenth century by a horizontal plane of glass walk. The cuts of top light divide the old structures from contemporary ones.

The old buildings are made of local sandstone mercy and old handmade bricks with warm colors yellow. The colors of the materials used are similar to Corten steel, dark brown stoneware for the floors. The treads of the stairs and walkway are made of mahogany. The lighting system is through the use of LED luminaires in warm light (3000 ° K) enhances the colors of the materials used The brick vaults of ancient environments, to highlight the agricultural origin of the house, were left to vistai. Get into the box steel and glass is like going through a time portal that through the colors and materials heralds the old buildings that connects.
